

iGSMCFP4G

Commercial Fire Communications Radio

Honeywell

MEETS NFPA72 2013 AND 2010 EDITIONS

**The Big Picture for Dealers...Grow Your Business
with VISTA® and Commercial Fire Radios**

Get fired up for RMR with the iGSMCFP4G and VISTA®

Meets NFPA72 2013 and 2010 Editions

Looking for opportunity in the code-driven commercial fire market? You can swap out your customers' landlines with a single, UL 864 listed iGSMCFP4G Fire Communications Radio—an excellent way to grow your business and RMR while saving your customers money every month! Plus, you've got the power of Honeywell's VISTA platform—ensuring a more seamless installation and performance that far surpasses dial-capture.

- Multi-path transmission capability eliminates the need for phone lines—letting your customers rely on you for their communications path instead of the phone company
- Ability to download to the VISTA panel ensures greater serviceability
- Fully compliant with NFPA72 2013 edition for sixty minute supervision and for NFPA72 2010 edition for five minute supervision
- Supervising at longer intervals helps reduce trouble occurrences and minimize costly visits to customer sites
- Reduces unnecessary service calls from maintenance communication troubles or intermittent network outages via the 60 minute NFPA 2013 supervision feature
- Provides RMR protection by leveraging technology that operates on 3G/4G networks
- Helps ensure account longevity

About NFPA72 2013

- For jurisdictions that have adopted the NFPA72 2013 edition, the iGSMCFP4G meets Chapter 26 section 26.6.3.1.5 requirements for a Single Communications Path when configured for IP only or cellular only
- For jurisdictions that have adopted 2013 and require a dual path solution for maximum survivability; the iGSMCFP4G meets Chapter 26 section 26.6.3.1.6 for multiple communication paths supervision requirements when configured as IP primary and cellular backup

Selectable Path	Description	Supervision Times
2010 GSM	Single path (cellular only)	5 minutes
2010 IP	Single path (IP only)	5 minutes
2010 IP & GSM	Dual path (IP primary and cellular backup)	24 hours
2013 GSM	Single path (cellular only)	60 minutes
2013 IP	Single path (IP only)	60 minutes
2013 IP & GSM	Dual path (IP primary and cellular backup)	6 hours
